Staff Assignments:

Matt Gundry, P.E. – Project Manager
Ryan Jarvis, E.I.T. – Project Engineer

Project Scope:

Fleming, Andre & Associates, Inc. was retained to provide structural engineering services that consisted of preparing a Bridge Rehabilitation Report for the Dewey Street Bridge (B-18-0093) over the Eau Claire River in the City of Eau Claire.

Deliverables included the Bridge Rehabilitation Report in accordance with Wisconsin Administrative Code Trans 213, recommendations for immediate and long term rehabilitation treatments, estimated costs for all recommendations as well as an on-site visit to compile the Bridge Rehabilitation Report. Due to concerns over whether rehabilitation could meet structural capacity requirements for a deck replacement, the report included rating the underlying arch structure.
