*Structure B-27-21*

**Staff Assignments:**

Matt Gundry, P.E. – Project Manager  
Ryan Jarvis, E.I.T. – Project Engineer

**Project Scope:**

Fleming, Andre & Associates, Inc. was retained to provide structure rehabilitation plans for five structures along IH 94 from the West County Line to STH 95 EB and WB in Jackson County, Wisconsin.

Deliverables include Structure Survey Reports, Structure Rehabilitation Plans, Pre-PS&E and Final PS&E. The bridge work included a concrete masonry overlay on a continuous haunched-slab bridge, polymer overlays on one continuous haunched-slab bridge and two continuous prestressed girder bridges, and polymer overlay and fiberwrap pier reinforcement on a continuous steel girder bridge. All structures were re-rated for load capacity. This project required a compressed timeline of less than 10 months and is scheduled for a May 2016 PS&E.
